## Introducing the New McHutchison

McHutchison began as the leader in the importation of nursery liners from Europe, greatly expanding the market in the United States. Along with bulbs, which were imported to the New York docks and shipped by rail, the address at Chambers Street became one of America's best-known horticultural addresses.

Today, McHutchison has grown to be one of the most well known North American broker companies specializing in both the nursery and the greenhouse business. McHutchison offers the highest quality plant material ranging from tissue culture and unrooted cuttings to finished annuals, perennials, trees and shrubs.

Our team of sales representatives located in North America work together to match customer specific needs to the best suppliers available. They are assisted by a highly trained sales support team to give you the most positive customer experience.

## Unrooted Cuttings and Stage 3 Tissue Culture Liners

We offer one of the largest selections of quality unrooted cuttings, TC3 liners and innovative varieties from a reliable network of domestic and international suppliers. Paired with our strong breeder relations, we can satisfy your every need.

Our worldwide producers have sophisticated operations and employ some of the most skilled growers in the industry. McHutchison takes pride in offering you clean, consistent product that will be successful for your business.
