

PROVIDER PROFILE

Hishtil was established in 1974, today consisting of 5 nurseries in Israel and nurseries abroad in Turkey, Italy, South Africa, Bosnia and Greece. Hishtil specializes in the production of vegetables, herbs, cut flowers of flowering annuals and potted ornamentals to wholesale outlets in the Israeli market and abroad. Hishtil focuses on developing and specializing in grafting of vegetable young plants which have become highly needed technology for environment friendly agriculture. Their mission is to provide horticultural solutions to improve the quality of food and environment.

Their unrooted cuttings are marketed and exported into the United States by Agrexco-Carmel whose worldwide logistical support ensures that their products arrive safely and on time-every time.

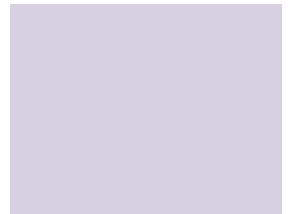

FEATURES & BENEFITS

Hishtil established Alon Tavor Industrial Zone near Afula, in 1989. Afula Nursery was established to produce their unrooted cuttings of perennials and herbs. Hishtil provides plant products that are uniformed and good shape. The uniformity and predictability of these outstanding young plants and cuttings are an outcome of a growing system which represents a comprehensive approach to the production procedures by the use of specialized biological know-how and controlled production technologies, executed by our well-trained and innovative growers. Hishtil takes great pride in being able to produce and ship such high quality unrooted cuttings.
