

PROVIDER PROFILE

Altman Plants business began in 1975 as a hobby for Ken and Deena Altman. They started a collection of unusual succulent plants at their home in Los Angeles, which later transformed into a wholesale nursery business covering over 880 acres in three states.

They are located in the North County of San Diego in a town called Vista, CA. Their production facility includes 675 acres of production and 3 million square feet of greenhouse. Known as the largest wholesale growers of cactus in North America, they offer an extensive program of cactus.

Ken and Deena Altman recently founded The Center for Applied Horticultural Research (CfAHR), this is a non-profit organization whose purpose is addressing, through research, the practical issues the nursery and floriculture industry may face.

FEATURES & BENEFITS

Altman Plants offers over 1000 species of cactus in sizes ranging from 2.5" pot to 10' tall. They also grow mimicry; they are succulents which have the ability to mimic other items in nature like stones or pebbles. Mimicry blend in with the items they are imitating as a method of survival which make it very difficult to disguise them.

Altman Plants also has a program called "Cactus Collection", these are a collection of assorted finished pots of cactus, or succulents or mimicry; a great way to receive many types of succulents. They delivery their product via fleet trucks all over the United States.

All of their plants are labeled by genus and species for the customer.

KEY ITEMS

Altman Plants grows succulents, cactus, and mimicry offered in a 50 tray, 72 tray or a finished pot. One of their unusual products they offer now is a 12" succulent wreath, very unique. Their specialty is Cactus Collection where you can purchase succulents, cactus or mimicry in a 2.5" pot, 3" pot, or 6" hanging basked assorted.
